5 Courses

Jun 5, 2023

Nguyễn Duy

has successfully completed the online, non-credit Specialization

Applied Data Science with R

In this Specialization, learners developed foundational knowledge of the R programming language and data science packages, considered essential skills for data scientists and data analysts. The learners worked hands-on with tools like R Studio and Jupyter notebooks. The Specialization focused on the full data analysis process, including data preparation and access, statistical analysis, data visualization, and predictive models. It also involved working with relational databases and querying them with SQL and R. Learners completed a Capstone Project at the end of the Specialization to apply their new knowledge and skills to a real-world inspired data science case study.

Introduction to R Programming for Data Science

SQL for Data Science with R

Data Analysis with R

Data Visualization with R

Data Science with R - Capstone Project

Rav Ahuja
Global Program Director,
Skills Network

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
