

NGUYEN HOANG DUY

Ho Chi Minh City | (+84) 923 132 208 | 220803duy@gmail.com | [Portfolio Website](#)

EDUCATION

Bachelor of Science in Artificial Intelligence

2022 - 2024

FPT University

- GPA: 3.3/4.0 | Focus: Deep Learning, Computer Vision & Data Science.

TECHNICAL EXPERTISE

AI & Deep Learning: Python (PyTorch, TensorFlow), OpenCV, MediaPipe, Langchain

Data Engineering: SQL, Pandas, NumPy, Tableau, Technical Indicators, Time-series

Intelligent Systems: LLM Orchestration (API AGENT), Multi-Agent Search, Automation

DOMAIN & SOFT SKILLS

Finance & Assets: Quantitative Trading, Real Estate Planning, Aircargo Warehouse Operations

Professional: Technical Reporting, Data Visualization, Market Research, Problem Solving

AWARDS & HONORS

City-Level Academic & Research Excellence

2019 - 2021

HCMC Dept. of Education and Training

- Participated in the 5th Ho Chi Minh City April Olympic Competition (2018-2019).
- Second Prize - City Contest of Science and Technology (2019-2020).
- Second Prize - City Contest of Science and Technology (2020-2021).

First Prize - Robocon Southern Vietnam

2020

Regional Championship

- Led technical architecture for the championship-winning autonomous robotics team.

First Prize - Apps4Vsmart

2020

VinUniversity STEME DAY

- Awarded First Prize for innovative mobile application design at VinUniversity.

EXPERIENCE

I. AI ENGINEERING & COMPUTER VISION

Vietnamese Lip-Reading System

2023

Project Lead & Architect

- Developed a LipNet-based Deep Learning model for Vietnamese viseme recognition.
- Integrated 3D-CNN and Bi-GRU layers with CTC Loss for temporal video processing.
- Deployed real-time inference pipeline using Streamlit with 65% accuracy rate.

AI Body Measurement Application

2023

CV Developer

- Orchestrated a pose-estimation pipeline using MediaPipe for contactless body measurement.
- Achieved 80% precision in image-to-metric transformation for fitness apparel industry.
- Automated data workflows to replace manual measurement processes.

II. DATA SCIENCE & QUANTITATIVE INTELLIGENCE

Quantitative Alpha Generation Bot

2024

Algorithm Developer

- Engineered a VN30F1M trading bot utilizing ML-based predictive signal generation.
- Backtested Alpha strategies on 5+ years of market data.
- Optimized execution latency and integrated real-time risk management protocols.

Multivariate Production Forecasting

2024

Lead Data Analyst

- Architected time-series models to forecast commodity production cycles and supply chain trends.
- Optimized model accuracy by analyzing complex feature dependencies in multivariate datasets.

III. INTELLIGENT AUTOMATION & LLMS

Automated Document Processing (IDP)

2025

Automation Lead

- Pioneered an AWB extraction pipeline using Gemini API, reducing manual entry by 70%.
- Designed robust JSON parsing workflows for seamless integration with core business systems.

Fitwear Market Intelligence Engine

2026

System Architect

- Built a multi-agent system to automate competitor tracking for SK & VN fitness markets.
- Utilized Gemini API for large-scale sentiment analysis and brand ranking (Xexymix, Andar).
