

NGUYEN HOANG DUY

Ho Chi Minh City | (+84) 923 132 208 | 220803duy@gmail.com | [Portfolio Website](#)

EDUCATION

Bachelor of Science in Artificial Intelligence

2022 - 2026

FPT University

- GPA: 3.3/4.0 | Focus: Deep Learning, Computer Vision & Quantitative Research.
- Specialized Research: Vietnamese Lip-Reading models and Market Intelligence automation.

TECHNICAL EXPERTISE

AI & Deep Learning: Python (PyTorch, TensorFlow), OpenCV, MediaPipe, Langchain

Data Engineering: SQL, Pandas, NumPy, Tableau, Technical Indicators, Time-series

Intelligent Systems: LLM Orchestration (API AGENT), Multi-Agent Search, Automation

DOMAIN & SOFT SKILLS

Finance & Assets: Quantitative Trading, Real Estate Planning, Aircargo Warehouse Operations

Professional: Technical Reporting, Data Visualization, Market Research, Problem Solving

AWARDS & HONORS

First Prize - Robocon Southern Vietnam

2021

Regional Championship

- Led technical architecture for the championship-winning autonomous robotics team.

First Prize - Apps4Vsmart

2020

VinUniversity STEME DAY

- Designed a high-impact mobile application awarded by VinUniversity leadership.

Second Prize - City Science & Technology Contest

2020-2021

HCMC Dept. of Education and Training

- Won Second Prize in the City-level Scientific Research Competition for High School Students.
- Recognized for excellence in technical innovation and scientific methodology.

EXPERIENCE

I. AI ENGINEERING & COMPUTER VISION

Vietnamese Lip-Reading System

2025 - 2026

Project Lead & Architect

- Developed a LipNet-based Deep Learning model for Vietnamese viseme recognition.
- Integrated 3D-CNN and Bi-GRU layers with CTC Loss for temporal video processing.
- Deployed real-time inference pipeline using Streamlit with 65% accuracy rate.

AI Body Measurement Application

2024 - 2025

CV Developer

- Orchestrated a pose-estimation pipeline using MediaPipe for contactless body measurement.
- Achieved 80% precision in image-to-metric transformation for fitness apparel industry.
- Automated data workflows to replace manual measurement processes.

II. DATA SCIENCE & QUANTITATIVE INTELLIGENCE

Quantitative Alpha Generation Bot

2025 - 2026

Algorithm Developer

- Engineered a VN30F1M trading bot utilizing ML-based predictive signal generation.
- Backtested Alpha strategies on 5+ years of market data.
- Optimized execution latency and integrated real-time risk management protocols.

Multivariate Production Forecasting

2025

Lead Data Analyst

- Architected time-series models to forecast commodity production cycles and supply chain trends.
- Optimized model accuracy by analyzing complex feature dependencies in multivariate datasets.

III. INTELLIGENT AUTOMATION & LLMS

Fitwear Market Intelligence Engine

2026

System Architect

- Built a multi-agent system to automate competitor tracking for SK & VN fitness markets.
- Utilized Gemini API for large-scale sentiment analysis and brand ranking (Xexymix, Andar).

Automated Document Processing (IDP)

2025 - 2026

Automation Lead

- Pioneered an AWB extraction pipeline using Gemini API, reducing manual entry by 70%.
- Designed robust JSON parsing workflows for seamless integration with core business systems.
